WORK

Software Developer
3WON, LLC.
June 2018 - Present

- Designed and evaluated a centralized dashboard to help the Home Depot developers troubleshoot cloud deployments, which would save around 20% of developers' time.
- Led kick-off meetings, interviews, design studios, and user testings.
- Advocated for the importance of User Experience and engaged the core team and stakeholders throughout the design process.

Intern iOS Developer
3WON, LLC.
May. 2017 - Aug. 2017

- **Design and implementation** of an iOS application for medical physicians to login into and attest to data that has been entered into 3WON's database. Java and Swift 3.0 were used to code while using Xcode as the IDE to build this application.

PROJECTS

UI/UX Designer
J.A.R.V.I.S - Final Project
Jan. 2018 - May. 2018

- **Designed, prototyped, and evaluated** a robotic arm's user interface that gives an individual the ability to freely control a robotic arm. The user can also select a program that can sort gumballs by color

UX Designer
Zara Website Redesign
Nov. 2018

- **Redesigned** fashion company Zara's website to improve user experience and grow user interaction.
Published the case study on Medium.
